

**APC LATE MODEL
SERIES
Memo**

APC Late Model Series Teams:

Technical Rule update:

6.15. No types of under-body air deflectors are allowed. “Panning” permitted under engine only. All air for blowers or coolers in the engine compartment must be pulled from the nose. Air may not be blown or forced onto the tire or bead. Air may only be directed to the brake rotors. The duct work between the nose and the radiator may not be carbon fiber and no wider than 29” inches.
