

Super Stock Race Day Procedures

Sunset Speedway Race event:

Ignition RPM Rule:

- Sunset Speedway – Sealed Crate - 6200 rpm, Built – 6400 RPM except Vortec or Dart heads – 6300 rpm.

Race Day Procedures:

- All Super Stock cars must pass tech inspection prior to going out for first practice session.
- TIRE Inventory – Only 9 tires permitted on inventory list (same inventory list as Sauble event) Any teams wishing to remove damaged tire from list **MUST** bring tire to SUNSET event & show tire to tech official in order to be removed from inventory.
- Qualifying – groups of five – 3 laps. Groups will be determined by practice times.
- Cars may be required to go through tech inspection & have weights checked after qualifying
- Cars will NOT be impounded prior to race.
- POST – RACE: All cars must meet all weight rules **AFTER** race. Top 5 to tech for inspection.
